ABSTRACT

Virginia's institutions of higher education conferred 29,757 degrees in 1973-74, an increase of 12 percent over the 26,498 conferred during the previous year. The document examines the enrollment trends for state supported institutions and privately controlled colleges and universities in the state. Some of the variables analyzed include: level, sex, and discipline division. Also included are analyses of collegiate professional certificates (high school endorsement) earned in Virginia state supported institutions by degree level, sex, and teaching field. (JMF)

Trends in Degrees Conferred

Virginia's institutions of higher education conferred 29,757 degrees in 1973-74, an increase of 12 percent over the 26,498 conferred during the previous year. This is a significant gain and compares with a 9 percent increase from 1972 to 1973. Of the 29,757 degrees, 23,658, or 80 percent, were awarded by state-supported colleges and universities, and 6,099, or 20 percent, were conferred by private institutions. In the four-year period from 1970-71 to 1973-74, the proportion of total degrees awarded by all state-supported institutions has increased from 74 percent to 80 percent. This increase reflects the continuing trend for state-supported institutions to enroll a greater proportion of Virginia's total college enrollment.

The number of degrees conferred at the Associate, Bachelor's, Master's, and Doctoral levels in Virginia continued to increase in 1973-74. The number conferred at the Associate level increased 27 percent over 1972-73, a direct result of rapid expansion of the state-supported Community College System. At the same time, the number of Bachelor's degrees conferred increased 10 percent, while Master's degrees increased 8 percent, and Doctoral degrees increased 23 percent. Expansion in the number and variety of graduate programs offered by the state-supported senior institutions has contributed to the rise in the number of Master's and Doctoral degrees awarded. For the first time in four years, however, the total number of First Professional degrees conferred actually dropped 2 percent. This decrease was a result of fewer degrees in theology and law. Overall, the annual rate of increase in the total number of degrees conferred by state-supported institutions has increased to its earlier level of almost 15 percent in 1973-74 after dropping to 14 percent in 1970-71 and to 12 percent in 1972-73.

The discipline divisions awarding the greatest number of degrees at all levels were the following: Education, 6,041, or 20 percent; Social Sciences, 3,534, or 12 percent; and Business and Management, 2,919, or 10 percent. The Occupational-Technical Discipline Division degrees, awarded only on the Associate level, accounted for 3,010, or 10 percent of the total number of degrees awarded by state-supported colleges and universities. This was up from 2,356 degrees, or 8 percent of the total in 1972-73.

STATE-SUPPORTED COLLEGES AND UNIVERSITIES

Of the 23,658 degrees awarded by Virginia state-supported institutions in 1973-74, 19,104 or 81 percent, were awarded by the fifteen senior institutions and 4,554, or 19 percent, were awarded by the two-year institutions. Nearly twenty percent of all the degrees awarded by state-supported institutions were Associate degrees, the great majority of which were conferred by Community Colleges. The only degree levels that showed a percentage increase in total degrees awarded in 1973-74 over 1972-73 were the Associate and Doctoral levels. With a three percent increase over 1972-73, the number of Associate degrees awarded as a percentage of the total degrees awarded has increased nearly 5 percent in the last four years.

Virginia's state-supported four-year institutions increased by 15 percent the number of degrees they conferred in 1973-74 over 1972-73, compared to an 8 percent increase in 1972-73 over 1971-72. The largest percentage increases over 1972-73 occurred at George Mason University and Old Dominion University. However, the University of Virginia, Virginia Polytechnic Institute and State University and Old Dominion University continued to award nearly 50 percent of all the degrees conferred. After a 40 percent increase in the number of degrees awarded in 1972-73 over 1971-72, the Community College System increased 38 percent in 1973-74 over the previous year.

The state-supported institutions conferred 57 percent of all Bachelor's and higher degrees within five conventional academic discipline divisions. Education continued to rank first with 5,156 degrees, an increase of 10 percent over 1972-73. The area of Social Studies had 2,376 degrees conferred for an 8 percent increase. Business and Management increased 11 percent, with 2,211 degrees awarded. Letters, which includes English and Literature, had 1,078 degrees, thus experiencing an increase of 2 percent after a 2 percent decrease last year. Finally, Engineering, which had an actual decrease of 2 percent in the number of degrees conferred, ranked fifth with 1,055 degrees awarded. Academic disciplines experiencing actual decreases in the numbers of degrees conferred were Pharmacy (-4 percent), Law (-5 percent), Library Science (-6 percent), and Mathematics (-3 percent).

At the Associate degree level, both Associate in Arts and Sciences and Associate in Applied Sciences degrees increased over 1972-73. The increase in Arts and Sciences was slightly greater (32 percent) than the increase in Applied Sciences (31 percent), though both are significant increases. Within the Occupational-Technical Discipline Divisions, Health Services and Paramedical Technologies represented the largest percentage increase with a 92 percent increase over 1972-73. Public Service-Related Technologies awarded the second highest number of Occupational-Technical degrees with a 35 percent increase. Of the 2,746 Applied Sciences degrees conferred by community colleges, 1,032 or 38 percent, were in the area of Business-Commerce Technologies, 21 percent were conferred in Mechanical and Engineering Technologies, and 21 percent in Public Service-Related Technologies. Women earned 45 percent of all degrees conferred by state-supported institutions in 1973-74, compared to 43 percent in 1972-73.

PRIVATELY CONTROLLED COLLEGES AND UNIVERSITIES

Of the 6,099 degrees awarded by private institutions in 1973-74, 844, or 14 percent, were Associate degrees. The largest number of degrees, 74 percent, were conferred at the Bachelor's level. Approximately the same proportion of total degrees were awarded in each of the five degree levels in 1973-74 as in 1972-73.

The increase in the number of degrees conferred by four-year privately controlled institutions was 4 percent in 1973-74 over 1972-73. The largest percentage increases were at the University of Richmond (21 percent), Eastern Mennonite College (16 percent), and the Institute of Textile Technology (13 percent). Institutions with decreases in degrees conferred included St. Paul's College with a 21 percent decline and Emory and Henry College with an 18 percent decrease. Lynchburg Baptist College, after recently receiving approval from the Council of Higher Education to grant Bachelor's degrees, awarded 27 degrees, a number expected to increase in the near future. Degrees conferred by two-year colleges decreased 30 percent, which was due partially to the conversion of Marymount to a four-year school. Of the four two-year private colleges only Ferrum College had an increase in the number of degrees awarded.

The major discipline divisions in which the greatest number of Bachelor's and higher degrees were conferred in 1973-74 by privately controlled institutions were the following: Social Studies, 1,158 degrees, or 22 percent; Education, 885 degrees, or 17 percent; and Business and Management, 708 degrees or 14 percent. These three disciplines constituted 52 percent of all Bachelor's and higher degrees conferred. Sixty-eight percent of all Associate degrees awarded were college transfer; i.e., Associate in Arts and Sciences degrees. Only two more degrees were awarded in 1973-74 in the Occupational-Technical Discipline Division than in 1972-73. However, Business and Commerce Technologies accounted for 53 percent of the 264 Associate in Science degrees conferred.

The privately controlled institutions awarded slightly more than one-half of all their degrees to women in 1973-74, and at the Associate level nearly two-thirds of the degrees were awarded to women.

Definitions*

Associate Degree
A degree awarded upon completion of at least two but less than four years of work beyond high school. In Virginia the degrees of Associate in Arts and Associate in Science are based on work that is wholly or chiefly creditable towards a bachelor's degree. The degree of Associate in Applied Science is based on work in one of the occupational-technical fields and is designed to prepare for immediate employment.

Bachelor's Degree
A degree granted upon completion of an educational program requiring at least four but not more than five years of academic work in the liberal arts, sciences, and professional fields.

First Professional Degree
A degree which signifies the completion of the academic requirements for a selected profession, which is based on an educational program which requires at least two academic years of previous college work for entrance and which requires a total of at least six academic years of college work for completion. (First professional degrees included in this report are the Bachlor of Laws [LL.B.], Doctor of Dental Surgery [D.D.S.], Doctor of Medicine [M.D.], and Juris Doctor [J.D.].)

Master's Degree
A degree customarily granted upon successful completion of one (sometimes two) academic years of work in the liberal arts and sciences beyond the bachelor's degree. The master's degree in professional fields is an advanced degree beyond the first professional but below the Ph.D. degree, such as Master of Laws (LL.M.). (Master's degrees in hospital administration and social work are included in the master's degree category in this report.)

Advanced Certificate
A certificate which requires one academic year's work past the master's and may take as much time as two calendar years. It indicates general knowledge and competence in a field of specialization and is most common to the discipline division of Education.

Doctor's Degree
The highest academic degree in a given discipline or profession, based generally on (a) three or more years of graduate work, (b) satisfaction of a foreign language requirement, and (c) completion of a special study issuing in a dissertation approved by a committee of the faculty. (Doctor's degrees included in this report are the Doctor of Education [Ed.D.], Doctor of Philosophy [Ph.D.], and Doctor of Science [D.Sc.] degrees.)

Collegiate Professional Certificate**
A five-year renewable certificate which is granted an applicant who has earned a bachelor's degree from an accredited college or university and has completed the general requirements (including general education), professional education, and specific endorsement requirements (elementary, high school, or special education) as established by the State Board of Education.
